Lovely Professional University

08/2013 - 05/2017   *Punjab, India*

Courses

- ECE Hons - 8.3 CGPA

Higher Secondary Education
Narayana Jr College

06/2011 - 05/2013   *Hyderabad, India*

Courses

- MPC - 93.1%

SKILLS

Python Django HTML CSS Bootstrap
JavaScript SQL XML XQuery GIT

PROJECTS

Utility Store

- It is a Web Application implemented using Python (Django), HTML, CSS and Bootstrap technologies.
- The project is to build one web store where all the tools required by the team are available at a single place and can be used by accessing the website from their respective machines.
- This reduces the effort of distributing the tools to everybody in the team and also helps the developers to push the updates directly to the server.

Projection Metrics

- It is a web application to check the projections of all the applications in the project.
- It is used to check the current status of any application.
- It shows stats of applications which are deployed and which are in development state using graphs.

Ad Hoc App Builder

- It is an automation tool to build Ad-hoc Applications based on user input.
- This tool takes user input from an excel sheet and builds applications which implements the business logic to fetch data from the database according to the requirement.
